

Navigating Cancer Care Summit

**Empowering Patients, Caregivers & Medical Professionals Through
Collaboration & Technology**

Our Vision & First-Year Approach

At Islands Against Cancer, Inc., we are dedicated to improving the cancer care experience by fostering collaboration between medical professionals, patients, caregivers, and advocates. Our Navigating Cancer Care Summits are designed to bridge the gaps in care, provide vital resources, and empower all involved in the cancer journey.

*As this is the inaugural year of the summits, we are committed to delivering high-quality, impactful events. However, because these events are entirely funded by our nonprofit, we must be strategic in ensuring that each summit is viable, well-attended, and sustainable for the future.

Our Commitment

- Hosting dynamic, patient-centered summits that provide education, resources, and support.
- Curating expert-led panels and discussions to address real-time challenges in oncology care.
- Creating networking and engagement opportunities for medical professionals and patients.

Why We Need Your Support

To make these summits a success, we rely on active participation from the medical community. Your involvement—whether as a speaker, panelist, attendee, or advocate—ensures that patients and caregivers receive the most relevant and up-to-date information to navigate their care effectively.

Event Viability & Adjustments

Because we are fully funding these summits, our ability to move forward depends on confirmed participation and engagement. As such:

- Summit topics will evolve based on medical expert input and patient needs.
- Event dates are subject to change based on participation levels. If necessary, we will consolidate summits to maximize impact.
- Our goal is to ensure each summit delivers significant value to all attendees while remaining financially sustainable for future programming.

How You Can Help

- Confirm your participation early so we can secure speakers and panelists.
- Encourage patient engagement by spreading the word about the summits.
- Provide input on topics to ensure the content is relevant and impactful.
- Consider sponsorship or resource support to help expand patient access and program sustainability.

By working together, we can ensure these summits successfully empower the cancer community and establish a lasting program for future years.

Thank you for your support in bringing this initiative to life!
